PRESS RELEASE – CEVISAMA 2019

STRACCIATELLA COLLECTION

STRACCIATELLA SERIES

The Italian technique of the Venetian terrazzo has inspired the new Stracciatella series by Arcana Tiles. An aesthetic characteristic of the XV century palaces highly valued by architects and interior designers thanks to its multiple qualities and design possibilities, especially highlighting the effect of visual continuity achieved on surfaces.

The new porcelain tile series is designed in the 80x80 cm rectified format to generate a great feeling of spaciousness in the room. In addition, its matte finish is very pleasant to the touch and provides homogeneity to the surface.

The series is composed of different designs: **Miscela** porcelain tile, available in a **Nácar** version and a **Grafito** version. Its beautiful graphics are formed by small and large incrustations that combine marble and cement details in a perfect balance. A current reinterpretation of the classic terrazzo ideal for all types of spaces and styles. A design that brings a touch of modernity to both walls and floors.

Stracciatella Nácar porcelain tile is a terrazzo of large chips that look like jewels of different sizes and stand out on the surface generating a spectacular effect. Its serene and versatile color together with the great chromatic variety of the granulated elements, allows it to be combined with furniture and materials of different styles and epochs, enriching the spaces and personalizing them. **Stracciatella Grafito**, on the other hand, plays with the color of the stones and the richness of the graphic details in a peculiar framework full of contrasts. A model designed for projects that stand out for their unique style and powerful character.

The series is complemented by the **Stellato Multicolor** porcelain tile, also made in the 80x80 cm format and in matt finish. A design with infinite decorative possibilities that combines different fragments of marbles from different graphics and styles creating original geometric compositions.

Within the same series, Arcana Cerámica also launches new ceramic format, 20x20 cm, with a whole new range of designs of encaustic inspiration. The **Battuto** porcelain tile, available in a Nacar and Grafito verions, is inspired by the appearance of the Venetian terrazzo playing with the size of the chips and materials. The **Granella Nácar** and **Granella Grafito** porcelain tiles are a tribute to the pixel art, building sensations through small units of color combined with the tonality of the base. **Zelten** is a design with soft features that unites past and present with its charming print full of chips of colour. The black and white binomial confirms to be a winning combination with the **Tegole** hydraulic tile. A baroque and elegant design adapted to the most creative minds. The series closes with **Guba**, **Amaretti**, **Budini** and **Taralli** encaustic designs. Made in pastel tones with a clear modernist inspiration, these four different designs reinvent the classic style to give it a new perspective more current and renewed.

ZALETTI SERIES

The new Zaletti wall tile series is made in 32x99 cm rectified format and a matte finish. Following the current design trend, **Zaletti-R** is the centerpiece of the series, and is available in the colors Blanco, Humo, Azul, Salmón, Siena and Musgo. Six tones to combine with the Stracciatella series, both in the 80x80 cm format and with the designs in 20x20 cm format.

The series is completed with the **Cantucci-R** wall tile, available in all shades of the series (Blanco, Humo, Azul, Salmón, Siena and Musgo) to combine with Zaletti tiles. Cantucci-R consists of a fine decorative volumetric effect, capable of filling any space with life. For those who wish to give a more personal and sophisticated touch to surfaces, the **Cassata-R** wall tiles (also available in shades Blanco, Humo, Azul, Salmón, Siena and Musgo) add some gold details to the composition, providing luminosity and an intense shine to any room.

The series also offers three decorated tiles: the multicolored **Zucchero-R** wall tile, an exquisite modern design full of joy and dynamism; and the **Pixel-R Nacar** and **Pixel-R Grafito** models, which emulate the effect of pixelation on surfaces, generating authentic contrasts of colour.
