

PRESS RELEASE – CEVISAMA 2019

LA MINE COLLECTION

Oxidized metal together with the most solid and essential cement inspire this new collection by Arcana Tiles. These two main materials of contemporary architecture are now also coming into our home to give it the purest urban and industrial style. The passage of time and this oxidation sculpt character and a unique beauty in the material creating pieces with life designed for daring souls.

Lens Series

The Lens porcelain tile series is designed for spaces with character and a cosmopolitan feel. With a wealth of graphic details, the **Lens-R** porcelain tile is the centerpiece of the series. It is launched in two more discrete shades inspired by the neutrality of cement (Ceniza and Sand), and three more powerful shades (Niquel, Cobre and Plomo), which reflect the strong characteristics of metal. The series is available in a variety of formats: 60x120 cm, 80x80 cm, 60x60 cm, 30x60 cm, 59.3x59.3 cm, and 29.3x29.3 cm. It is also available in a matt finish as well as a *lappato* or semi-polished finish for the formats of 60x120 cm and 80x80 cm, which give a distinguished and sophisticated touch to the composition.

Three mosaics of different styles are added to the wide range of formats of this series: On the one hand, the **Arques Mosaic** in 30x30 cm format is the perfect complement to give your bathroom or kitchen a very elegant urban style. The **Avelin Mosaic**, also in 30x30 cm, is composed of pieces of 10 cm² decorated with gold listels to give glamor to your spaces. This mosaic is available in a matt finish and also in a *lappato* finish for those who look for a bright touch on their surfaces. And the **Bruay Mosaic** (30x30 cm), formed by ceramic strips of different thicknesses that add movement and dynamism to the surfaces.

The series is completed with the **Marles** decorated piece in 60x60 cm format. This piece presents interesting tribal motifs with metallic flashes, and is available in five colour versions

(Ceniza, Sand, Niquel, Plomo and Cobre). Finally we also have the **Auchel** design (30x60 cm), available in the five tonalities of the series: Ceniza, Sand, Niquel, Plomo and Cobre. A stunning background punctuated with realistic graphics that creates a modern industrial look.

Douai Series

Unique pieces with character make up the new Douai wall tile series by Arcana Tiles. Designed to combine and enrich the Lens porcelain tile series, Douai is inspired by the style of large cities and their skyscrapers to recreate their cosmopolitan personality in ceramics.

The **Douai-R** wall tile is the centerpiece of the series, made in the 32x99 cm rectified format. Douai recreates, with its four tonalities (Ceniza, Sand, Niquel and Plomo), the rawness and unique spirit of cement and metal. Its mottled effect worn down by time adds value to the surfaces with it being very pleasant to the touch.

The **Scarpe-R** wall tile, also designed in the format of the rectified 32x99 cm and made in the four shades of the series (Ceniza, Sand, Niquel and Plomo), can create unique ambients thanks to its simple but effective three-dimensional effect on surfaces. Finally, the **Calais-R** wall tile design (32x99 cm rectified), available in the four tones of the series (Ceniza, Sand, Niquel and Plomo), presents an original scheme with a metallic finish that generates movement and creates surfaces that can only be described as pure elegance.
